Education

Stanford University

B.S. and M.S. in Computer Science

Expected June 2027

Human-Computer Interaction Track

Experience

Founding Engineer

Human Behavior (YC X25), AI product analytics startup

June 2026 – Present

San Francisco, CA

- Scaled the ClickHouse-backed ingestion pipeline to 78K sessions/day, serving 10+ customers at \$100K+ ARR
- Designed the runtime that lets customers deploy scheduled analytics agents to Slack, SMS, and email
- Built error tracking and monitoring, providing crash capture, source-map symbolication, and fingerprint grouping
- Shipped an MCP server that lets coding agents query production analytics, cutting payload size by 55%
- Delivered one-click migration from PostHog, Sentry, Amplitude, and Mixpanel with full replay parity

Software Engineering Intern

Google, On-Device Abuse Protection

June 2025 – September 2025

Sunnyvale, CA

- Cut abuse protection rollout times from hours to minutes for 20+ teams by consolidating redundant deploy steps
- Built a “Deploy and Bundle” interface enabling clients to select and launch automated workflows
- Automated client role management, propagating updates from commit to storage in under 50 seconds

Software Engineering Intern

Uber, Matching Intent

June 2024 – September 2024

San Francisco, CA

- Implemented a cross-sell pop-up offering Wait & Save to UberX riders to reduce high-demand matching churn
- Extended the existing upsell framework to handle cross-sell triggers through 7 configurable eligibility flags
- Verified every trigger path in a simulated rider app, booking trips against low-supply conditions

Projects

Stanford Root | stanfordroot.com | Next.js, TypeScript, Tailwind CSS, Supabase

January 2026 – Present

- Built a Stanford course discovery platform now used by 10,000+ students, grown by organic word of mouth
- Added multi-filter search, waitlist and enrollment tracking, and schedule sync across devices
- Automated a Puppeteer and Cheerio pipeline that turns raw course evaluations into a queryable schema
- Cut repeat load times to under 200ms across a catalog of 10,000+ courses with multi-layer caching

MonkeyHouse | Next.js, TypeScript, Tailwind CSS, Firebase, OpenAI API

April 2025 – June 2025

- Shipped an intern roommate matching web app that pairs users on survey-driven compatibility
- Designed a weighted scoring engine with OpenAI free-text parsing to flag preference conflicts and rank matches

ScentSync | Next.js, TypeScript, Tailwind CSS, MongoDB, OpenAI API

January 2025 – March 2025

- Launched an eco-friendly routine recommender over 1,000+ Environmental Working Group (EWG) beauty products
- Engineered a web scraping module to collect, structure, and query product data from the EWG database

PropaGONE | React, Python, JavaScript, Claude API

April 2024 – June 2024

- Developed a Chrome extension using Claude that flags and explains manipulative language in news articles
- Added thumbs up/down feedback to tune prompts and few-shot examples to improve detection accuracy

Skills and Interests

Languages: TypeScript, Python, Go, Java, JavaScript, C, C++, SQL, HTML, CSS

Frameworks: Next.js, React, React Native, Node.js, Tailwind CSS, REST APIs, Puppeteer, Cheerio

Data: ClickHouse, PostgreSQL, MongoDB, Redis, Supabase, Firebase

AI and Infrastructure: OpenAI API, Claude API, MCP, AWS (S3), Docker, Git, GitHub

Interests: Spanish (B2), investing, poker, weightlifting, bouldering, bullet chess, coffee
